

Exceptions

Overview

In this lab, we will specify boundaries on the Employee properties and behaviors by specifying expected exceptions. This lab builds on the xUnit lab.

Steps

- Add tests that expect exceptions to verify the following rules
 - An employee's first and last name must be at least 1 character in length and a max of 30. Only alpha, spaces, dash, apostrophes allowed
 - An employee's salary must be between 50 and 500 inclusive
 - An employee's hire date must be in the past
- Run the test to verify failure
- Modify *Employee* to satisfy the tests
