Deconstruction

Overview

This lab builds on *FirstLab*.
In this lab, add deconstructors to the *Employee* class.

Steps

- Add the following deconstructors to the *Employee* class.

```
public void Deconstruct (out string FullName, out double Salary,
                         out double YtdGross )
public void Deconstruct(out string FirstName, out string LastName,
            out double Salary,
            out double YtdGross, out DateTime HireDate)
```

- Update *Program.cs* to verify the deconstructors
